

# Junction Views LOD3

## Providing Superior Visual Guidance

Junction Views provide an additional visual aid to the driver before and during an maneuver.

The Junction View LOD3 shows a photo-realistic view of the maneuver context when it matters most – at the point of decision. The Junction Views LOD3 are produced for selected junctions and complement the generalized Junction Views (Tomtom Junction View linkage file).

### Reasons to Use TomTom Junction Views LOD3

- Eliminate ambiguity during maneuvers by providing detailed visual guidance
- Enhance the driving experience with realistically detailed Junction View images
- Stringent quality control assures high situational fidelity and excellent image quality
- Differentiate from the competition and make your product offering irresistible to the end-user

### Product Feature Highlights

- Linked to the Tomtom global navigable map
- Superior coverage and constantly expanded and updated
- Available for Asia Pacific Region only

### Format Offerings

- PNG with side file linking to Multinet

### Coverage

#### APAC Coverage
